Our third silent auction will be held at our Fall Show, and we are soliciting items for donation. The last two years have proved the best items for bidding purposes are artifacts: Items using the German Shepherd Dog in drawings, paintings, statues, lithographic prints, signage, etc. have the most interest and bring in the most income. Books are great too, and they can be the GSD oldies, or on health, or even GSD related story books. Perhaps you have two of a kind, and will donate one to the cause. All donors are credited for the item, and I am hoping we receive more art and handcrafted things for this years auction. Our goal is to break \$500.00 this year. Last year we came close. Thank you in advance for your help!

Call Lee Trapp and tell him what you wish to donate. Lee can be reached at most meetings. Lee's telephone number

is 636-949-0328, or e-mail address is Leetrapp@aol.com.

Remember!!!! All income is donated to the Animal Health Foundation.

German Shepherd Dog Club of St. Louis, Inc. Upcoming Events

August 5, 2001 – Club Picnic at Lang Park in Arnold Missouri. The picnic is scheduled to begin at 12:00 Noon, at the first pavilion on the right as you enter the park.

September 21, 2001 - Regular Club Meeting at 7:30 P.M. Educational Program: Marilee Wilkinson has volunteered to speak at the September meeting. The program will be "Treatment and Prevention of DM" Marilee has been researching this disease and spending much time reading about this late life crippler of our beloved GSDs. She will share with us some research that was not discussed at the DM program that was held last fall.

September 30, 2001 - 2001 Fall Specialty and Obedience Show, at Emmenegger Park (formerly known as Kirkwood Pool and Park Complex) in Sunset Hills, MO. (at the intersection of I-44 and I-270) Conformation Judge: Patricia E. Robinson, Jr. Showmanship: Dr. Mary B. Adelman. Obedience: ? Silent Auction for American GSD Charitable Foundation. For more information contact: Terry Rock, Chairperson (636) 451-4110 email: TRocknroll@aol.com or Barb Gambill, Show Secretary (314) 773-2839 email: BEG48@aol.com. standina K-9 Service Awards will be presented at noon. GSDC of St. Louis Meeting Minutes

BOARD MEETING MINUTES June 7, 2001

The monthly Board meeting of the G.S.D.C. of St. Louis, Inc. was called to order at 8:25 P.M. by President Gail Stiefferman at Uncle Bill's Restaurant.

The roll was called. Ricky Harrison, Marilee Wilkinson and Terry Rock were excused.

The minutes of the May 18, 2001 Board meeting were read and corrected.

The minutes of the May 18, 2001 Regular meeting were read.

The Treasurer's Report was read. Alice Becker, Corresponding Secretary, had Thank You notes from Nancy Kearney's family and the Humane Society for the donation in Nancy's name, a Thank You note from the ADOA (American Dog Owners Assoc.) for the donation and an invitation to a parade on September 8.

COMMITTEE REPORTS

Phone Line: Barb Gambill reported that she has been getting calls about Obedience, puppies, and someone needing a dog to track for a lost pet.

Training: Lois O'Connor stated that the next Novice class would begin September 12 and the Puppy class would begin September 26. Trainers and helpers are very needed for this committee.

'01 Fall Specialty (Sept. 30): Alice Becker reported that the Obedience judge would be Sara Jane Jednecz. She also stated that John DeHope (Conformation) and Ed Haas (Obedience) would be the judges for the '02 Spring Specialty. A show secretary is needed for that show.

Education: Lee Trapp mentioned possible subjects for 2002 - animal health & healing, SchH, acupuncture, tracking, Redbook & Futurities, and nutrition. These programs will begin in March.

By-Laws: Marcia Hadley stated that the info letter had been sent.

Marcia Hadley stated that the Brentwood Recreation Center had contacted Marilee Wilkinson that the regular room we have our meetings in will be available for the rest of the year.

Annual Awards, Royal Hecht: Marcia Hadley felt that the new bylaws will change the award rules. A committee will be developed to work on these rules. Alice Becker and Barb Gambill will serve on this committee.

Wag-n-Tongue: Liana New is working on the current Wag. Last year Liana had mentioned that she may not be able to continue editing the Wag. Lee Trapp thanked her for her excellent job with the Wag.

Marcia Hadley asked if S.IL.G.S.D.C. was coming over here for the '01 Fall Specialty, Alice Becker said yes, she has written that club.

OLD BUSINESS

Marcia Hadley will be getting together memorials for Nancy Kearney.

Barb Gambill showed an embroidered picture on a T-shirt and there was a discussion on the T-shirts.

Conformation classes haven't been held lately due to weather.

NEW BUSINESS

Marcia Hadley mentioned about club members becoming Life Members. Lee Trapp moved that Jo Ann Tillman become a Life Member. The motion was seconded by Barb Gambill and passed. Marcia Hadley moved that Charles Wolford become a Life Member. The motion was seconded by Alice Becker and passed.

President Stiefferman mentioned that members have asked about an audit being held. President Stiefferman will get a committee together and handle this.

Marcia Hadley speaking for Marilee Wilkinson, reported that Marilee is volunteering to handle the Flower Committee and she will also volunteer to purchase judge's gifts. President Stiefferman appoints Marilee Wilkinson as the chairperson of Judge's Gifts.

There being no further business, Marcia Hadley moved that the meeting be adjourned. The motion was seconded by Liana New and passed. The meeting was adjourned at 10:40 P.M.

Respectfully submitted, Kathy Redford Recording Secretary

> REGULAR MEETING MINUTES June 15, 2001

The monthly Regular meeting of the G.S.D.C. of St. Louis, Inc. was called to order at 8:15 P.M. by President Gail Stiefferman at the Brentwood Recreation Center.

The roll was called.
The minutes of the May 18, 2001
Board meeting were read.
The minutes of the May 18, 2001
Regular meeting were approved

as read.

The Treasurers' Report was read. Alice Becker, Corresponding Secretary, read Thank You notes from Ricky Harrison and her Family, the Humane Society for the donation in Nancy Kearney's name, and from the ADOA (American Dog Owners Assoc.) for the donation and membership. Alice also had letters about a Fall Festival parade on September 8 and a letter from the Parent Club about trophy donations. Alice reported that the Obedience judge for the '01 Fall Spewill be Sara Tane Jednecz; the '02 Spring Specialty Obedience judge will be Ed Haas and the Conformation judge will be John DeHope.

COMMITTEE REPORTS

Education: Lee Trapp stated that Suzie Franz will speak about animal therapy at the July meeting.

Conformation Class: Ricky Har-

Page 7

Meeting Minutes (Continued)

rison reported that Greg has been at the Des Peres park twice with no one showing for the class. He will continue the class if people attend. The class will begin at 7:00 at Des Peres Park.

Wag-n-Tongue: Liana New reported that the next Wag will be a double version (March/April & May/June) and it will be mailed next week.

Silent Auction: Lee Trapp is collecting gifts for this auction and would like collectible items. This goal this year is to get over \$500.

Training: Lois O'Connor stated that the graduation for the last class had been held and the next Novice class will begin September 12. She reported that the committee needs help with the future classes.

Refreshments: Gail Rutter thanked everyone who had brought refreshments tonight.

'01 Fall Specialty: Terry Rock has volunteers for the committees, but needs some clean-up volunteers.

OLD BUSINESS

Marcia Hadley explained the by -law revisions and there was a discussion on this issue. Bill Harper moved that past Presidents have a voting right on the board. The motion was seconded by Alice Becker and passed. Bill Harper moved that all the revisions be accepted. The motion was seconded by Dyan Harper and President Stiefferman passed. thanked Marcia Hadley and the committee members for organizing the by-laws revisions.

NEW BUSINESS

Helen Rock mentioned an upcoming Temperament Test.

Page 8 Alice Becker moved

that the club donate \$50 for a Conformation trophy and \$50 for an Obedience trophy to the upcoming National Specialty. The motion was seconded by Bill Harper and passed.

Jo Ann Leistner moved that regular business be put aside for the presentation. The motion was seconded by Barb Gambill and passed.

There was a short break.

Lee Trapp introduced Lois O'Connor who spoke about her litter that produced seven Champions.

A raffle netted \$53. A brag box netted \$18.

Marilee Wilkinson moved that the meeting be adjourned. The motion was seconded by Bill Harper and passed. The meeting was adjourned at 10:20 P.M.

Respectfully submitted, Kathy Redford Recording Secretary

An Epitaph found on a pet's tombstone:
"The reason I loved him is plain to see: with all my faults, he found beauty in me"

People are often unreasonable, illogical, and selfcentered; Forgive them anyway.

If you are kind, people may accuse you of selfish, ulterior motives; Be kind anyway.

If you are successful, you will win some false friends and some true enemies; Succeed anyway.

If you are honest and frank, people may cheat you; Be honest and frank anyway.

What you spend years building, someone could destroy overnight; Build anyway.

If you find screnity and happiness, they may be jealous; Be happy anyway.

The good you do today, people will often forget to-morrow; Do good anyway.

Give the world the best you have, and it may never be enough; Give the world the best you've got anyway.

So, you're thinking about attending the Canadian National this year?

Spectacular by Nature Things to see and do while in travels along the rugged **British Columbia**

Vancouver is home to some of the most breathtaking natural scenery in the world

Vancouver City Highlights

hour from host hotel)

Walk down cobble-stoned street into Vancouver's original frontier town. Surround yourself in history in our news and court yards full of creative architecture. It's a world of eclectic galleries, specialty and Canadian shops. Here you find some of Vancouver's finest dining in quaint settings.

Chinatown

View Vancouver's cultural diversity in action.

Robsonstrasse

High fashion shopping center with lots of quaint shops.

False Creek/Granville Island (about an hour from host hotel)

talization program. Don't miss the colorful public National Historic Site featuring the original and reconmarket. Marvel at the warehouses transformed into structed buildings of the Hudson Bay Company fort theatres, artists' studios and craft stores. Enjoy the that became "the Birthplace of British Columbia." In freshness that is Granville Island. Complete our tour this charming small town you can explore inviting with a scenic "mini cruise" on the sheltered waters of antique shops, art galleries and a selection of restau-False creek.

North Vancouver (about an hour from host hotel) Ride the Grouse Mountain Sky ride to a viewpoint of 3,700 feet above the city. Talk a walk on the Capilano Suspension Bridge which is the longest and highest suspended footbridge in the world, it spans 450 feet across a river canyon at a height of 230 feet. While there take in the Capilano Fish Hatchery - learn about the life cycle of the Pacific Salmon.

Whale Watching Tours

These are available and well worth the trip.

Ride the Royal Hudson steam train. This is one of the distance of 64km, the ride takes about 2 hours and god.

Howe Sound coastline. Catch the bus to the magic of Whistler village. See breathtaking mountain lakes and glaciers, enjoy Shannon Falls, at over 1000 feet, it is one of North America's highest water-Gastown - a Historic area of Vancouver (about an falls. Explore the unique European-styled Whistler Town Centre. Take a high speed lift to the top of Whistler or Blackcomb Mountains.

Victoria, B.C.

Take a day trip to Victoria, a bit of Olde England on Vancouver Island. Enjoy a 90 minute cruise across Georgia Strait and through the beautiful Gulf Islands. Enjoy a walk through the magnificient Butchart Gardens. Visit the Empress Hotel and view the Parliament Buildings.

Richmond (about 45 minutes from Host Hotel)

A must see is Steveston Village - an old fishing village where you can get the catch-of the day. Enjoy the clothing stores, arts & crafts and outdoor cafes.

Fort Langley (about 15 minutes from Host Hotel) Granville Island is Canada's most creative urban revi- Within the village of Fort Langley lies Fort Langley rants.

White Rock (about 20 minutes from Host Hotel) Five miles from the U.S. Border lies the picturesque seaside city of White Rock. Only three square miles, White Rock enjoys an active artistic community, beachside "vacation" atmosphere and warm climate. Along White Rock's south coast overlooking the warm shallow waters of Semiahmoo Bay, White Rock Beach is a haven for swimmers, beachcombers and picnic lovers. White Rock 's 1500 foot pier reaches out in the bay and offers great fishing. A stroll along Whistler Mountain Resort (about 4 hours from host the promenade is a voyage of discovery, with many seaside shops and restaurants, plus the famous "White Rock," a giant stone said by Indian legend to last operational steam locomotives in Canada. With a have been tossed onto the beach by a powerful sea

> There is so much to see and do, and we could go on with other highlights, but we think we have covered the most scenic ones.

General Information

Weather: for September is usually 65-70 F or 18 C and

could possibly be raining

Motor Vehicles: Seatbelts are compulsory in BC

Taxes: There is a 7% Goods & Services Tax in effect in BC. I believe that visitors can obtain an instant GST rebate by submitting all GST receipts (up to \$500.00 Canadian) to a participating duty-free shop

10 reasons to have a GSD

- 1. You can take him shopping and he does not care about waiting around.
- 2. Walking or jogging with your German Shepherd contributes to your physical well being.
- 3. Hugging your German Shepherd for 20 minutes a day is conducive to better mental health.
- 4. German Shepherd hair in your food is a nutritious condiment.
- 5. A German Shepherd is ALWAYS available for a conversation.
- 6. A German Shepherd is ALWAYS available for snuggling, smooches, and strokes.
- 7. A German Shepherd always GIVES BACK smoothes, strokes, and snuggles.
- 8. A German Shepherd improves your work environment and encourages you to be a better role model.
- 9. A German Shepherd improves your self esteem.
- 10.A German Shepherd improves your image and leads to promotions and a fab-

Litter Nomination Form

German Shepherd Dog Club of America, Inc.

2002 National Futurity

Litters Whelped Oct. 1, 2000 - Sept 30, 2001 Litter Nominations close January 1, 2002

Breeder or Co-Breeder of the AKC registered litter must be a member of the GSDCA or must apply with this nomination.

An individual owner may nominate a litter, but this form must be signed by the breeder and the breeder must nominate the litter in the region which the breeder resides.

Nomination fee will be \$20.00 per litter for members of the GSDCA or those applying for membership with an enclosed Form and fee. Nomination is limited to members of the GSDCA or applicants for membership. Nomination is extended to 120 days by paying late fees of \$50.00 in addition to the \$20.00 or until nominations close with a late fee of \$100.00. No fee may be refunded.

Make check or money order (in US funds only) payable to GSDC of America.

Forward completed litter nomination and fee to JIM RAU DOG SHOWS within 90 days following date of whelping. A four generation pedigree must be submitted with this nomination.

The National Specialty Conformation Show will be held indoors at the Agriplex. The Temperment Test and CKC Herding Trials will take place outside, and there will also be 4 Obedience Trials for German Shepherd Dogs only.

There is RV Parking on site and it is \$25.00 per night, included hookups, and also shower facilites. RESERVATIONS well in advance is a must.

The Host Hotel is the Ramada Limited Hotel 19225 Hwy 10, Surrey. For reservations call: 1-888-576-8388. Quote **GSD National Specialty Show**

Please phone for premium lists or email me with your name and address, etc.

Dinner and Dance will be held at the Sunrise Executive Par 3 Golf Course 5640 - 188th Street, Surrey, B.C.

* hwy 10, between Cloverdale and Langley

Please contact Ren MacGregor renmac@radiant.net or Ona Steffensen at #604-534-2344 in the evenings only or ona@brookswoodshepherds.com. For further information regarding the herding trials please contact Shelley Fritzke at This is too funny not to share! A friend sent me this story, for anyone who obedience trials, don't laugh.

I was teaching classes 5 nights a week, three hour long classes each night. I always took my dog, Schaumette, as my demonstration dog. Now she was fully trained, right through utility, but I hadn't had the time to enter her. Finally, as Seattle Kennel Club Benched show was coming up, I decided to enter her for her first novice leg. I, of course, told all my students! Come the day of the show, there we were, benched, ready, eager and secretly thinking we had a good chance for high in trial...I mean, how many Utility dogs are entered in Novice?

They called our class. Schaumette was healing all through the crowds like a real trooper, why wouldn't she? After all, she was trained through Utility. (Can anyone see where this is going?)

About 30 of my students had arrived and were at ringside to watch THEIR instructor and the Marvelous Schaumette perform (can you now see where this is going???)

Our number was called. We heeled up to the gate. Entered. The judge, (A very well known and respected obedience judge...Seattle KC always hires the best) came up and asked if I was ready? I said "Yes Ma'am." Off we went, following instructions. I'd glance at Schaumie and she was in perfect position, sitting every time. Figure 8...PERFECT! Stand for Exam...she didn't move a muscle, except to wag her tail at this nice lady judge. Off Lead. Judge said forward. Once again I did a perfect heeling pattern...following every command... yes I did a perfect heel...Schaumie was sitting with the Judge! When she tired of that she casually strolled around the ring saying "HI" to each of my students. I was horrified. This was my Utility Dog!!!

The judge finally gave up and said exercise finished. Recall...I left Schaumie, waited for the judges signal and called her...she BOUNDED towards me, veering at the last second to go to the judges table to help herself to a mint!

And to top it all off, after I captured Schaumette and put her back on lead, this wonderful lady judge, (who shall remain nameless) came up, put her arm around my shoulder as I walked out of the ring and said, (so that all my shocked students could hear her) "You know dear, if you took her to an obedience class she might improve!"

I'm sure, to this day, that wonderful lady judge wonders why 30 people were rolling around on the floor, holding their sides from laughing so hard. I merely replied, "Yes, Ma'am...I'm sure you're right!"

Since that time, and many, many obedience titles later, I've found that if there is any way that a dog can embarrass you in the ring, they'll do it, just for the laughter they get from ringside. See you next time in the ring!

Bruce J. Garber, D.V.M.

IS YOUR DOG ELIGIBLE FOR AOE?

Each year the Award of Excellence is given at the National to dogs meeting the following requirements:

- 1.) Dog must be a champion.
- 2.) Dog must have earned the "Select" title at this show.
- 3.) Dog must have a passing OFA certification for hips. Dog must have OFA certification for elbows.
- 4.) Dog must have earned a regular AKC obedience degree including tracking and herding and/or SV or WDA degree.
- 5.) Dog must have a passing grade for the GSDCA Temperament Test. Proof of fulfillment of the above requirements must be furnished to the AOE chairman. Contact: Helen Franklin, AOE Chairman 406 San Miguel Circle, Port

Hueneme, CA 93041X805 -271-0043 AOE-

"THE TOTAL DOG CONCEPT" عربط المراجل ا

Ways to know you are doing too many rescues:

- 1. Your friends remark about your unique dog-fur seat covers.
- 2. A friend asks you if you want to go for a Sunday drive and you say you have to check the transport list first.
- 3. Your engine starts knocking so you pour a bottle of Rescue Remedy in the gas tank.
- 4. You get stopped for having illegally tinted windows and the officer does not believe those are nose prints.
 - 5. You take your car to the car wash and ask for the flea bath.
- 6. You take your dog to the groomer but miss the appointment because your dog is still checking out all the strange doggie smells in your car and refuses to get out.
- 7. You sit down to plan your vacation and you begin dividing the route into legs.
- 8. You are pulled over for speeding and give the officer your rabies certificate.
- 9. You schedule your car's preventive maintenance at the Vets.
- 10. Your boss asks you to make his/her travel arrangements for an upcoming business trip, so you post him/her to all the transport lists.
- 11. You refer to your favorite Western Bagel shop as the West- ern Beagle Shop.
- 12. You open your glove compartment and all you have inside are three dog leashes, a hand full of cat treats, 13 dog biscuits, 1/2 bag of rabbit pellets, two Dog Breed Reference Guides, and a complete list of local Shelters.
- 13. You find that when other people bring out the kid pics and brag.....you whip out the "rescued kids!" and brag!
- 14. You find that you literally start foaming at the mouth the instant you see an un-neutered dog/cat.
- 15. You find yourself not only petting your friend's dog or cat.....but also doing health and temperament checks.
- 16. After you have health and temperament checked your friend's pet, you proceed to do a thorough home check!
- 17. Your "regular" friends refuse to answer the door, phone, or email because of the possibility (make that probability) that you need a foster or forever home for another beastie.
- 18. You go to call your best friend, and find that you have inadvertently dialed the kennel section of the Animal Shelter!

Yep..... we are definitely in need of professional help.

Counting Points At Dog Shows

You have just won your first Winners Class at a dog show. All your hard work has finally paid off, you're ecstatic...your dog is excited...but now comes the hard part. How many points did Blaze actually earn??

Here is a quick and easy guide to calculating points that doesn't require an advanced degree in mathematics. The American Kennel Club requires a dog to obtain a total of 15 points with two major wins (a major win is worth three points or higher) to become a champion. The majors must be won under different judges and at least one other judge must award some of the remaining points - so you need to win under at least three different judges.

Class, Winners, and Breed Competition

Class dogs are judged in classes against other dogs of the same sex - open, puppy, bred-by-exhibitor, American-bred, novice - are just a few. Classes can also be divided by age (as in puppy) or color. When the judge awards first place in a class that dog advances to the Winners competition of its sex.

During the Winners competition, the judge re-examines all the dogs that have received first place in the classes and picks an overall winner - Winners Dog for males and Winners Bitch for females. Although you may have beaten several dogs in the classes, championship points are only awarded to Winners Dog and Winners Bitch. No points are awarded for class wins or Reserve Winners.

Your Winners Dog or Winners Bitch can also win points in the Best of Breed competition. Best of Breed consists of dogs that have already received their championship. Winners Dog and Winner Bitch also compete with the champions in Best of Breed. There are three possible awards a dog can win at this level:

Best of Breed - Awarded to the best dog in the Best of Breed competition

Best of Opposite Sex - Awarded to the best dog of the opposite sex to the Best of Breed winner

Best of Winners - Awarded to the best dog between Winners Dog and Winners Bitch

Counting Points

Step One: Take Attendance

Count the number of dogs or bitches competing in the regular classes of your dog's sex novice, puppy, bred-by-exhibitor, American Bred, and Open classes. Remember to include your dog in the total! Don't count any dogs that are absent (no shows), disqualified, dismissed, excused, or have awards withheld. These dogs do not count in computing the number of dogs competing for that show. If you did not keep up with the total number of dogs in the regular classes, ask the ring steward or check the posted copies of the judge's book for a count of total dogs before you leave the show.

Tip: Check the posted copies of the judges' book before you leave the show to make certain your dog was marked as the winner. Mistakes do happen! Also, verify that your dog's AKC registration number is correct in the catalog. If it is not correct, let the superintendent know before you leave the show. In both cases, it's easier to make the correction on the day of the show rather than later.

Step Two: Check the Schedule of Points

Compare the number of dogs competing that day to the schedule of points for your dog's breed and sex located in the show catalog. The schedule is usually listed with the entries for each breed or at the front of the catalog.

If the number of dogs does not match exactly with those listed in the catalog, choose the number of points assigned to the next lowest number.

An example of a point schedule is listed below:

Remember, point schedules vary by show location. If you are not at the show, make certain

Schedule of Points									
1 Pc	oint	2 Pc	ints	3 Pc	oints	4 Pc	oints	5 Pc	oints
Dog	Bitches	Dog	Bitches	Dog	Bitches	Dog	Bitches	Dog	Bitches
2	2	4	5	7	8	10	12	15	19

you get the points schedule for the event region where your dog won. Refer to the Schedule of Points.

Step 3: Calculating Points for Winners Dog or Winners Bitch

Your dog receives the points according to the number of dogs of your dog's sex competing in the regular classes.

Let's say that Blaze is awarded Winners Dog. After accounting for absent, disqualified, and excused dogs, you determine that a total of 6 dogs competed in the regular classes. Assuming the point schedule listed above, he receives 2 points.

Now it's your turn...

Blaze's sister, Bianca, wins Winners Bitch. Nine bitches competed in the regular classes. How many points did she earn as Winners Bitch?

Answer: 3 points

Winning More Points In the Breed Competition

Your dog can add to the points won in the Winners Class during the Best of Breed competition. If your dog wins:

Best of Breed

Count the total number of dogs in its sex plus the total number of Champions of both sexes entered in the Best of Breed competition to figure the number of points earned.

Best of Opposite Sex

Count the total number of dogs in its sex plus the total number of Champions of its sex entered in the Best of Breed competition to figure the number of points earned.

Best of Winners

This one is a bit different. If your dog is named Best of Winners, he is awarded the highest point level awarded between Winners Dog and Winners Bitch. Let's say that Blaze beats out his sister, Bianca, for Best of Winners. If you'll remember Bianca received three points for Winners Bitch and Blaze received only two points for Winners Dog. Since Blaze took Best of Winners, he is awarded three points instead of two and receives one of the majors he needs for his championship.

Now it's your turn...

Using the point schedule and results listed below, compute the point totals for the Winners Dog and Winners Bitch.

Winners Dog and Best of Winners: I'm A Perfect Hound

Number of Dogs:

Open: 3

Page 20

Bred-by-Exhibitor: 1

American Bred: 1

Winners Bitch and Best of Opposite Sex: Three Times A Lady

Number of Bitches:

Open: 4

American Bred: 2

Number of Champions:

Dogs: 2

Bitches: 2

Schedule of Points									
1 P	oint	2 Pc	oints	3 Pc	oints	4 Pc	oints	5 Pc	oints
Dog	Bitches	Dog	Bitches	Dog	Bitches	Dog	Bitches	Dog	Bitches
2	2	4	5	7	8	10	12	15	19

Points Awarded To:

I'm A Perfect Hound (Answer: 3) Three Times A Lady (Answer: 3)

Here's What Happened...

Prior to the Best of Breed competition, I'm A Perfect Hound and Three Times A Lady had racked up 2 points each. In the Breed competition, Three Times A Lady won Best of Opposite Sex beating two champion bitches in addition to the six bitches competing in the regular classes. This win increased her points to three. Since I'm A Perfect Hound was awarded Best of Winners, he received three points as well (the highest point value awarded between Winners Dog and Winners Bitch).

Verifying Points

It is important to check on your dog's point totals from time to time. The AKC offers an online service to verify the number of points your dog has accumulated toward a champion-ship. Allow four to six weeks for your dog's win to be recorded in this system.

AKC's grants you one-time, non-exclusive right to use the article Counting Points at Dog Shows found at http://www.akc.org/dic/events/point.cfm for purposes in your club newsletter. This right is contingent

upon properly attributing American Kennel Club as the source of this material and including the web address www.akc.org on corresponding printed materials.

GSDCA Breeder's Code

STATEMENT OF PURPOSE

The purpose of this Breeders' Code shall be to serve as a guideline for a minimum standard of excellence in the ownership, breeding and sales of the German Shepherd Dog. To that end, I hereby pledge to:

HEALTH

- I. Maintain the highest possible standards of health, cleanliness and care in my kennel. This includes, but is not limited to proper veterinary care, regular contact with people and exposure to the outside world for proper socialization of all my dogs.
- **II.** Urge all buyers to have a puppy or adult dog sold by me, examined by a licensed veterinarian within 72 hours of receipt. The buyer will pay for the examination.
- **III.** Deliver or ship only puppies or adult dogs of sound health and temperament. Where the buyer or his authorized representative did not personally see and choose said dog, a period of 48 hours is granted to advise of the final decision and an additional 48 hours is provided if the dog is to be returned.

BREEDING

- **I.** Encourage bitch owners to breed only if they have facilities, time and resources to adequately care for a litter and upon strong evidence of the possibility of finding suitable homes for the resultant litter.
- **II.** Refuse stud service to any bitch I consider in poor health, physically or mentally unsound, or lacking the necessary breed characteristics as set forth in the German Shepherd Dog standard. Before or at the time of breeding, an exchange of pedigrees and hip and elbow X-ray information must be made.
- **III.** Allow one repeat service where a bitch has failed to conceive after being bred to one of my studs, if the stud is still in good health and available, and at such time and place as mutually agreed upon by the owner of the bitch and myself.
- **IV.** Breed my own bitches only when I have a definite goal for improvement of the breed in mind, never permitting them to produce three consecutive litters unless breeding consecutive litters is recommended by a veterinarian. I fully understand that I am responsible for keeping and/or finding suitable homes for the resultant puppies.

SALES

- **I.** Use a sales contract or written agreement in any sale or purchase involving a dog. The sales contract offered by the German Shepherd Dog Club of America, or one similar to it, which covers guarantees and agreements must be used with a signed copy to each party involved.
- **II.** Refuse to sell or recommend breeders who do not conform to the ideals and obligations expressed in this Code and refuse all sales to dog wholesalers and retailers.
- **III.** Provide buyers of my German Shepherd Dogs with a four-generation pedigree, complete health records, accurate breeding, OFA and registration records, except that registration papers my be withheld or limited in the case of a dog who the parties have agreed in writing will not be bred, until it has been spayed/neutered as evidenced by veterinary confirmation.
- IV. Provide a copy of the German Shepherd Dog Standard to accompany any puppy or adult dog sold by me.
- **V.** To encourage and invite the new owners of any dog sold by me to attend some type of training class and to join in becoming guardians of the Breed by participating in local dog club activities, educational programs, a regional German Shepherd Dog club and/or the German Shepherd Dog Club of America.
- **VI.** assure puppy buyers that if at any time the buyer has to place the dog, the breeder must be notified and given the opportunity to assist the buyer in placing the dog.

NOTE TO MEMBERS: Only GSDCA members in good standing may be official signers of the Breeders' Code. Membership termination also voids your status as a signer of the code. You must re-sign the Breeders' Code when you rejoin the GSDCA. Return the signed form to: Jamie Walker, 424 Shirk Lane SW, Albuquerque, NM 87105, which will insure your being placed

Page 22 on the Breeders' Code roster and your receiving a printed Breeders' Code certificate for your records and/or dis-

There isn't much out there that bugs a dog. But there are times when things can get under the skin of even the coolest dogs. Here are some of their top pet peeves in dogs from the mouths of dogs themselves.

- 1. Leaving the Toilet Bowl Lid Down. Humans just don't understand that the water is cold, fresh and always tastes better there. For the little dogs that have never been able to reach this delightful experience you don't know what you are missing!
- 2. Not sharing in the fruits of your labor. I don't mean fruit actually. I mean that beautiful, 1 ½ -inch steak you cooked to such aromatic perfection. We're all part of the pack, right? Why am I not getting my share?
- 3. Not Understanding My Behavior. Okay, so I like to greet strangers by leaping on them. I like to chase my tail by that lead crystal vase you call an heirloom. I'm not misbehaving; I'm a dog for crying out loud. It's all good, like shadow chasing, helps build eye-to-paw coordination.
- 4. Bathing. What is with the daily bath thing that humans do? And why do they inflict that obscenity upon me on occasion? Just when I think I am smelling fine, they bathe me. I really don't understand. I'm only going to go out and roll in something again They just do not appreciate the effort it takes to get that perfect doggie odor.
- 5. Rushing Me to Potty. Don't they know that there is a true art to finding the right spot? Just because they did not get up in time, they are running late, they want me to Hurry up and Potty. Have a little respect. This is my chance to shine!
- 6. Being Away. I love attention and being around people, noise and excitement. When you are away, at work, or running errands ... this is time away from me. Don't you know? It is ALL about me. Your life should revolve around me AND I can make you regret leaving me behind............
- 7. Nail Trims. They are my nails I spend lots of time growing them and here they come again touching my feet. hate that!
- 8. Not Letting Me Chase the Squirrel. They torment me by placing a glass wall called a window between me and lots of critters outside. How annoying. All I want to do is play with them. The other thing they do is restrain me with this thing called the leash. I want to run forward and I am pulled back. If they can't keep up, they should just let me go. What is a dog to do?
- 9. Cat Nip. Now this is one peeve that really annoys me. I see the cat roll and play and even cry out in joy in response to cat nip. I smell it, eat it, lick it and.. nothing happens. Nothing. I don't get it.
- 10. Not Letting Me at the Mailman. This is so unfair. I wait all day for the mailman and finally he comes. The anticipation is great. Then, they hold me back. Tell me to be quiet. Very annoying. They don't appreciate the fact that the mailman comes everyday and I single handedly scare him away! My bravery and courage are unappreciated.
- 11. When My Owner is Playing with the Other Dog or Cat. This really hurts my feelings. Seeing MY owner play with someone else. It is all about me... They really don't understand.
- 12. Won't Let Me at the Litter Box. I think of it as an opportunity for a tootsie roll snack. My owners get all grossed out, run around and then actually deny me access to what I desire the most. I am actually helping to clean up. What's the problem?
- 13. Expecting me to Be at Their Beck and Call. For a treat I have to do some little humiliating trick and pretend I like it. What about independence, freedom and respect?
- 14. Sharing the Bed. I don't understand why I have to sleep on the floor. Why can't I have the bed and they sleep on the floor? I work hard all day and night. I protect my owners, guard the house and scare away invaders of my castle such as the mailman, cats, squirrels, and a multitude of other creatures. I should be pampered.
- 15. Rolling up the Windows. I feel such joy from the little words of wanna go bye bye. This gives me thoughts of having the window down with cool wind blowing through my hair, looking just dynamite as other dogs stare from the curbs in envy and awe. And just when I am really getting into it head out, ear flapping, they roll up the window. Then I am forced to stare at other dogs going by with their heads out the window. Mega bummer.
- 16. Cats. What really makes me angry is the agility and grace of cats. They have the gifted ability to jump up on things and escape under things with such ease. I really wish I could do that. When I try to do that, I inevitably break or knock something over.

He's just my dog. He is my other eyes that can see above the clouds; my other ears that hear above the winds.

He has told me more than a thousand times over that I am his reason for being -- by the way he rests against my leg, by the way he thumps his tail at my smallest smile, by the way he shows his hurt when I leave without taking him. (I think it makes him sick with worry when he is not along to care for me).

When I am wrong, he is delighted to forgive.

When I am angry he clowns to make me smile.

When I am happy, he is joy unbounded.

When I am a fool, he ignores it. When I succeed, he brags.

Without him, I am only another person.

With him, I am all powerful.

He has taught me the meaning of devotion is loyalty itself.

With him, I know the secret comfort and a private peace.

He has brought me understanding where before I was ignorant. His head on my knee can heal my human hurts.

His presence by my side is protection against my fears of dark and unknown things. He has promised to wait for me ... whenever ... wherever ... in case I need him, and I expect I will, as I always have.

Who is he? -- He's just -- MY DOG!

Herding Trial Liaison Committee: Theresa Royer, Jennifer Root, Gloria Rice, Dorothy DeLisle. Herding Advisor/HAC Delegate Linda Rorem. Herding Trial Show Chairman Kelly Malone.

Training Tips for the Puppy: The best advice I have ever given puppy owners is to get a newspaper and roll it up very tight. Secure it with a rubber band and leave it on the coffee table. Then, when the puppy piddles in the house, chews up a slipper or does anything he's not supposed to do, simply take the newspaper and bang it on the top of YOUR head very hard while repeating... should have been watching my puppy!" "I should have been watching my puppy!"

"DEVELOPING HIGH ACHIEVERS"

Surprising as it may seem, it isn't capacity that explains the differences that exist between individuals because most seem to have far more capacity than they will ever use. The differences that exist between individuals seem to be related to something else. The ones who achieve and out perform others seem to have within themselves the ability to use hidden resources. In other words, it's what they are able to do with what they have that makes the difference.

In many animal-breeding programs the entire process of selection and management is founded on the belief that performance is inherited. Attempts to analyze the genetics of performance in a systematic way have involved some distinguished names such as Charles Darwin and Francis Galton. But it has only been in recent decades that good estimates of heritability of performance have been based on adequate data. Cunningham (1991) in his study of horses found that only by using and measuring Timeform data, groups of half brothers and half sisters could good estimates of performance be determined. His data shows that performance for speed is about 35% heritable. In other words only about 35% of all the variation that is observed in track performance is controlled by heritable factors, the remaining 65% are attributable to other influences, such as training, management and nutrition. Cunningham's work while limited to horses provides a good basis for understanding how much breeders can attribute to the genetics and the pedigrees. Researchers have studied this phenomena and have looked for new ways to stimulate individuals in order to improve their natural abili-

ties. Some of the methods discovered have

Page 26

produced life long lasting effects. Today, many of the differences between individuals can now be explained by the use of early stimulation methods.

Introduction

Man for centuries has tried various methods to improve performance. Some of the methods have stood the test of time, others have not. Those who first conducted research on this topic believed that the period of early age was a most important time for stimulation because of its rapid growth and development. Today, we know that early life is a time when the physical immaturity of an organism is susceptible and responsive to a restricted but important class of stimuli. Because of its importance many studies have focused their efforts on the first few months of life.

Newborn pups are uniquely different than adults in several respects. When born their eyes are closed and their digestive system has a limited capacity requiring periodic stimulation by their dam who routinely licks them in order to promote digestion. At this age they are only able to smell, suck, and crawl. Body temperature is maintained by snuggling close to their mother or by crawling into piles with other littermates. During these first few weeks of immobility researchers noted that these immature and underdeveloped canines are sensitive to a restricted class of stimuli which includes thermal, and tactile stimulation, motion and locomotion.

Other mammals such as mice and rats are also born with limitations and they also have been found to demonstrate a similar sensitivity to the effects of early stimulation. Studies show that removing them from their nest for three minutes each day during the first five to ten days of life causes body temperatures to fall below normal. This mild form of stress is sufficient to stimulate hormonal, adrenal and pituitary systems. When tested later as adults, these same animals were better able to withstand stress than littermates who were not exposed to the same early stress exercises. As adults, they responded to stress in "a graded" fashion, while their non-stressed littermates responded in an "all or nothing way."

Data involving laboratory mice and rats also shows that stress in small amounts can produce adults who respond maximally. On the other hand, the results gathered from non-stressed littermate show that they become easily exhausted and would near death if exposed to intense prolonged stress. When tied down so they were unable to move for twenty-four hours, rats developed severe stomach ulcers, but litter mates exposed to early stress handling were found to be more resistant to stress tests and did not show evidence of ulcers. A secondary affect was also noticed.

Sexual maturity was attained sooner in the littermates given early stress exercises. When tested for differences in health and disease, the stressed animals were found to be more resistant to certain forms of cancer and infectious diseases and could withstand terminal starvation and exposure to cold for longer periods than their non-stressed littermates. Other studies involving early stimulation exercises have been successfully performed on both cats and dogs. In these studies, the Electrical Encephalogram (EEG) was found to be ideal for measuring the electrical activity in the brain because of its extreme sensitivity to changes in excitement, emotional stress, muscle tension, changes in oxygen and breathing. EEG measures show that pups and kittens when given early stimulation exercises mature at faster rates and perform better in certain problem solving tests than nonstimulated mates. In the higher level animals the effect of early stimulation exercises have also been studied. The use of surrogate mothers and familiar objects were tested by both of the Kelloggs' and Dr. Yearkes using young chimpanzees. Their pioneer research shows that the more primates were deprived of stimulation and interaction during early development, the less able they were to cope, adjust and later adapt to situations as adults.

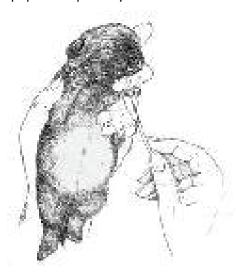

While experiments have not yet produced specific information about the optimal amounts of stress needed to make young animals psychologically or physiologically superior, researches agree that stress has value. What also is known is that a certain amount of stress for one may be too intense for another, and that too much stress can retard development. The results show that early stimulation exercises can have positive results but must be used with caution. In other words, too much stress can cause pathological adversities rather than physical or psychological superioritv.

Methods of Stimulation

The U.S. Military in their canine program developed a method that still serves as a guide to what works. In an effort to improve the performance of dogs used for military purposes, a program called "Bio Sensor" was developed. Later, it became known to the public as the "Super Dog" Program. Based on years of research, the military learned that early neurological stimulation exercises could have important and lasting effects. Their studies con-

firmed that there are specific time periods early in life when neurological stimulation has optimum results. The first period involves a window of time that begins at the third day of life and lasts until the sixteenth day. It is believed that because this interval of time is a period of rapid neurological growth and development, and therefore is of great importance to the individual.

The "Bio Sensor" program was also concerned with early neurological stimulation in order to give the dog a superior advantage. Its development utilized six exercises which were designed to stimulate the neurological system. Each workout involved handling puppies once each day. The workouts required handling them one at a time while performing a series of five exercises. Listed in order of preference the handler starts with one pup and stimulates it using each of the five exercises. The handler completes the series from beginning to end before starting with the next pup. The handling of each pup once per day involves the fol-

1. Tactile stimulation — Holding the pup in one hand, the handler gently stimulates (tickles) the pup between the toes on any one foot using a Qtip. It is not necessary to see that the pup is feeling the tickle. Time of stimulation 3 - 5 seconds.

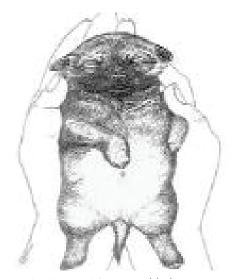

2. Head held erect - Using both hands, the pup is held perpendicular to the ground, (straight up), so that its head is directly above its tail. This is an upwards position. Time of stimulation 3 - 5 seconds

3. Head pointed down – Holding the pup firmly with both hands the head is reversed and is pointed downward so that it is pointing towards the ground. Time of stimulation 3 - 5 seconds

Reminder, the German Shepherd Dog Club of St. Louis supports and endorses April Kornfeld at 10 Scenic Drive Arnold, MO 63010 636-296-7225 as our German Shepherd Rescue person. Please ensure that all communication that you have currently reflects the correct person in your listing for our club rescue. Thanks!

Page 27

4. Supine position – Hold the pup so that its back is resting in the palm of both hands with its muzzle facing the ceiling. The pup while on its back is allowed to sleep struggle. Time of stimulation 3-5 seconds.

5. Thermal stimulation – Use a damp towel that has been cooled in a refrigerator for at least five minutes. Place the pup on the towel, feet down. Do not restrain it from moving. Time of stimulation 3-5 seconds.

lowing exercises:

Tactical stimulation (between toes)

Head held erect

Head pointed down

Supine position

Thermal stimulation

These five exercises will produce neurological stimulations, none of which naturally occur during this early period of life. Experience shows that sometimes pups will resist these exercises, others will appear unconcerned. In either case a caution is offered to those who plan to use them. Do not repeat them more than once per day and do not extend the time beyond that recommended for each exercise. Over stimulation of the neurological system can have adverse and detrimental results. These exercises impact the neurological system by kicking it into action earlier than would be normally expected. The result being an increased capacity that later will help to make the difference in its performance. Those who play with their pups and routinely handle them should continue to do so because the neurological exercises are not substitutions for routine handling, play socialization or bonding.

Benefits of Stimulation

Five benefits have been observed in canines that were exposed to the Bio Sensor stimulation exercises. The benefits noted were:

Improved cardio vascular performance (heart rate)

Stronger heart beats
Stronger adrenal glands
More tolerance to stress and
Greater resistance to disease.

In tests of learning, stimulated pups were found to be more active and were more exploratory than their non- stimulated littermates over which they were dominant in competitive situations.

Secondary effects were also noted regarding test performance. In simple problem solving tests using detours in a maze, the non-stimulated pups became extremely aroused,

wined a great deal, and made many errors. Their stimulated littermates were less disturbed or upset by test conditions and when comparisons were made, the stimulated littermates were more calm in the test environment, made fewer errors and gave only an occasional distress when stressed.

Socialization

As each animal grows and develops three kinds of stimulation have been identified that impact and influence how it will develop and be shaped as an individual. The first stage is called early neurological stimulation, and the second stage is called socialization. The first two (early neurological stimulation and socialization) have in common a window of limited time. When Lorenz, (1935) first wrote about the importance of the stimulation process he wrote about imprinting during early life and its influence on the later development of the individual. He states that it was different from conditioning in that it occurred early in life and took place very rapidly producing results which seemed to be permanent. One of the first and perhaps the most noted research efforts involving the larger animals was achieved by Kellogg & Kellogg (1933). As a student of Dr. Kellogg's I found him and his wife to have an uncanny interest in children and young animals and the changes and the differences that occurred during early development. Their history making study involved raising their own new born child with a new born primate. Both infants were raised together as if they were twins. This study like others that would follow attempted to demonstrate that among the mammals there are great differences in their speed of physical and mental development. Some are born relatively mature and quickly capable of motion and locomotion, while others are very immature, immobile and slow to develop. For example, the Rhesus monkey shows rapid and precocious development at birth, while the chimpanzee and the other "great apes" take much longer. Last and slowest is the human infant.

One of the earliest efforts to investigate and look for the existence of socialization in canines was undertaken by Scott-Fuller (1965). In their early studies they were able to demonstrate that the basic technique for testing the existence of socialization was to show how readily adult animals would foster young animals, or accept one from another species. They observed that with the higher level animals it is easiest done by hand rearing. When the foster animal transfers its social relationships to the new species, researchers conclude that socialization has taken place. Most researchers agree that among all species, a lack of adequate socialization generally results in unacceptable behavior and often times produces undesirable aggression, excessiveness, fearfulness, sexual inadequacy, and indifference toward partners.

Socialization studies confirm that the critical periods for humans (infant) to be stimulated are generally between three weeks and twelve months of age. For canines the period is shorter, between the fourth and sixteenth week of age. During these critical time periods two things can go wrong. First, insufficient social contact can interfere with proper emotional development which can adversely affected the development of the human bond. The lack of adequate social stimulation, such as handling, mothering and contact with others, adversely affects social and psychological development.

Second, over mothering can prevent sufficient exposure to other individuals, and situations that have an important influence on growth and development. The literature shows that humans and animals respond in similar ways when denied minimal amounts of stimulation. In humans, the absence of love and cuddling increases the risk of an aloof, distant, asocial or sociopathic individual. Over mothering can also have its detrimental effects. It occurs when a patient insulates the child from outside contacts, or keeps the apron strings tight, thus limiting opportunities to explore and interact. In the end, over mothering generally produces a dependent, socially maladjusted and sometimes emotionally disturbed individual.

The absence of outside social interactions for both children and pups usually results in a lack of adequate learning and social adjustment. Protected youngsters who grow up in an insulated environment often times become sickly, despondent, lacking in flexibility and unable to make simple social adjustments. Generally, they are unable to function productively or to interact successfully then they become adults.

Owners who have busy life styles with long and tiring work and social schedules often times cause pets to be neglected. Left to themselves with only an occasional trip out of the house or off of the property they seldom see other canines or strangers and generally suffer from poor stimulation and socialization. For many, the side effects of loneliness and boredom set-in. The resulting behavior manifests itself in the form of chewing, digging, and hard to control behavior (Battaglia).

It seems clear that small amounts of stress followed by early socialization can produce beneficial results. The danger seems to be in not knowing where the thresholds are for over and under stimulation. Many improperly socialized young-

sters develop into older individuals unprepared for adult life, unable to cope with its challenges, and interactions. Attempts to re-socialize them when adults have only produced small gains. These failures confirm the notion that the window of time open for early neurological and social stimulation only comes once. After it passes, little or nothing can be done to overcome the negative effects of too much or too little stimulation.

The third and final stage in the process of growth and development is

called enrichment. Unlike the first two stages it has no time limit and by comparison covers a very long period of time. Enrichment is a term which has come to mean the positive sum of experiences, which have a cumulative effect upon the individual. Enrichment experiences typically involve exposure to a wide variety of interesting, novel, and exciting experiences with regular opportunities to freely investigate, manipulate, and interact with them. When measured in later life, the results show that those reared in an enriched environment tend to be more inquisitive and are more able to perform difficult tasks. The educational TV program called Sesame Street is perhaps the best known example of a children's enrichment program. The results show that when tested, children who regularly watched this program performed better than playmates who did not. Follow up studies show that those who regularly watched Sesame tend to seek a college education and when enrolled, performed better than playmates who were not regular watchers of the Sesame Street Program.

There are numerous children studies that show the benefits of enrichment techniques and programs. Most focus on Page 29

improving self-esteem and self-talk. Follow up studies show that the enriched Sesame Street students when later tested were brighter and scored above average and most often were found to be the products of environments that contributed to their superior test scores. On the other hand, those whose test scores were generally below average, (labeled as dull) and the products of underprivileged or non-enriched environments often times had little or only small amounts of stimulation during early childhood and only minimal amounts of enrichment during their developmental and formative years. Many were characterized as children who grew up with little interaction with others, poor parenting, few toys, no books and a steady diet of TV soap operas.

A similar analogy can be found among canines. All the time they are growing they are learning because their nervous systems are developing and storing information that may be of inestimable use at a later date. Studies by Scott and Fuller confirm that non-enriched pups when given free choice preferred to stay in their kennels. Other litter mates who were given only small amounts of outside stimulation between five and eight weeks of age were found to be very inquisitive and very active. When kennel doors were left open, the enriched pups would come bounding out while littermates who were not exposed to enrichment would remain behind. The non-stimulated pups would typically be fearful of unfamiliar objects and generally preferred to withdraw rather than investigate. Even well bred pups of superior pedigrees would not explore or leave their kennels and many were found difficult to train as adults. These pups in many respects were similar to the deprived children. They acted as if they had Page 30

become institutionalized, preferring the routine and safe environment of their kennel to the stimulating world outside their immediate place of residence.

Regular trips to the park, shopping centers and obedience and agility classes serve as good examples of enrichment activities. Chasing and retrieving a ball on the surface seems to be enriching because it provides exercise and includes rewards. While repeated attempts to retrieve a ball provide much physical activity, it should not be confused with enrichment exercises. Such playful activities should be used for exercise and play or as a reward after returning from a trip or training session. Road work and chasing balls are not substitutes for trips to the shopping mall, outings or obedience classes most of which provide many opportunities for interaction and investigation.

Finally it seems clear that stress early in life can produce beneficial results. The danger seems to be in not knowing where the thresholds are for over and under stimulation. However, the absence or the lack of adequate amounts of stimulation generally will produce negative and undesirable results. Based on the above it is fair to say that the performance of most individuals can be improved including the techniques described above. Each contributes in a cumulative way and supports the next stage of development.

Conclusion

Breeders can now take advantage of the information available to improve and enhance performance. Generally, genetics account of about 35% of the performance but the remaining 65% (management, training, nutrition) can make the difference. In the management category it has been shown that breeders should be guided by

the rule that it is generally considered prudent to guard against under and over stimulation. Short of ignoring pups during their first two months of life, a conservative approach would be to expose them to children, people, toys and other animals on a regular basis. Handling and touching all parts of their anatomy is also necessary to learn as early as the third day of life. Pups that are handled early and on a regular basis, generally do not become hand shy as adults.

Because of the risks involved in under stimulation a conservative approach to using the benefits of the three stages has been suggested based primarily on the works of Arskeusky, Kellogg, Yearkes and the "Bio Sensor" program (later known as the "Super Dog Program").

Both experience and research have dominated the beneficial effects that can be achieved via early neurological stimulation, socialization and enrichment experiences.

A butcher is working, and really busy. He notices a dog in his shop and shoos him away. Later, he notices the dog is back again.

He walks over to the dog, and notices the dog has a note in his mouth. The butcher takes the note, and it reads, "Can I have 12 sausages and a leg of lamb, please."

The butcher looks, and lo and behold, in the dog's mouth there is a ten dollar bill. So the butcher takes the money, puts the sausages and lamb in a bag, and places it in the dog's mouth.

The butcher is very impressed, and since it's closing time, he decides to close up shop and follow the dog. So, off he goes.

The dog is walking down the street and comes to a crossing. The dog puts down the bag, jumps up and presses the crossing button. Then he waits patiently, bag in mouth, for the lights to change. It does, and he walks across the road, with the butcher following.

The dog then comes to a bus stop, and starts looking at the timetable. The butcher is in awe at this stage. The dog checks out the times, and sits on one of the seats to wait for the bus.

Along comes a bus. The dog goes and looks at the number, notices it's the right bus, and climbs on. The butcher, by now open-mouthed, follows him onto the bus.

The bus travels through town and out to the suburbs. Eventually the dog gets up, moves to the front of the bus, and standing on his hind legs, pushes the button to stop the bus. The dog gets off, groceries still in his mouth, and the butcher still following.

They walk down the road, and the dog approaches a house. He walks up the path, and drops

the groceries on the step. Then he walks back down the path, takes a big run, and throws himself -whap!- against the door. He goes back down the path, takes another run, and throws himself -whap! - against the door again!

There's no answer at the door, so the dog goes back down the path, jumps up on a narrow wall, and walks along the perimeter of the garden. He gets to a window, and bangs his head against it several times. He walks back, jumps off the wall, and waits at the door. The butcher watches as a big guy opens the door, and starts laying into the dog, really yelling at him.

The butcher runs up and stops the guy. "What the heck are you doing? This dog is a genius. He could be on TV!"

To which the guy responds, "Clever, my eye. This is the second time this week he's forgotten his key!"

Our June program was dedicated to Lois for breeding 7 Champions in one litter. We honored Lois and listened to her discuss this record breaking accomplishment. This has never happened before, and is a first for the German Shepherd breed. We invited all members of the club and friends of Lois to come and participate in the celebration of this great feat. Tally (the mother) was present to take part in the celebration. Lois bred her bitch CH Chlomaxsi's Talitha V D and L ROM CD TT OFA to CH Windwalker's Jolly Roger to get this fantastic litter! See the 1998 RED BOOK, Pages 140 & 141 for more details of this breeding.

These pictures were taken at our June Regular Club meeting by Steve Dobbins on his cam-corder, pretty awesome pictures if you ask me. Hopefully this black and white print does them justice. The pictures are of Lois O'Connor with her litter that has 7 champions. I think this topic was on the big list a bit ago. Anyhow.....there are two dogs missing, one passed away and the other didn't come. Page 33

I am on a german shepherd list (no, besides the showgsd list) and I'm allowed to post pictures there. I sent the pictures that Steve Dobbins took with his camcorder of Lois and her dogs and here are the responses I received about the pictures:

"WOW I love these pictures, not only is it impressive about all the dogs that finished their Championships, but just looking at the dogs themselves show a definite type/resemblance's to each other. You can tell the quality is consistent."

"Awesome, simply awesome. This is something we will probably never totally comprehend. Congratulations to her for this fabulous breeding."

"What a great bunch of photos. Thats quite a feat to get all those dogs behaving for the picture, let alone breeding that fantastic litter. Thanks for posting these."

"Not just the fabulous breeding -- but getting the dogs all shown and finished! That's something!!"

"What great pictures."

"Nice pics and did Lois repeat the breeding.??? Wow.. Very impressive litter!"

^*^^^*

"Wow! What an accomplishment! Congrats to her!"

Frank's dog, Little Girl, jumped on the bed at 4:15 and licked his face till he woke up and would not let him alone. The lucky part of this is he was out of cigarettes and had to go out to his van for a pack. Normally he parks in back but because of unhooking his boat trailer, he left it in front. Coming back to house he saw the fire. Lightning had hit the house and the gas line and it was shooting flames. Of course, his first thought was it was outside my window so he came to wake me first. I never got out of bed so fast. Than he had the sense and guts to go out and turn off the gas tank. That's my boy. I heard on the news that there were quite a few homes

hit last night. Thank God for Page 34 large favors. Fran Foster

I just got a phone call from a very excited Myra Shear...Today at the Deluth KC Montery Jack V. Oh-My took a Major Reserve making Ch Hadori's Joan Rivers V Oh-My Joanie is out of Hadori's Xacta bred to 2x Am GV Campaigners Gatewood Uzi ROM. Way to go Myra and thank ? you.

Ricky Harrison

DeRousse's Cut Loose Caralon got a 3 pt major at Sedalia K C going WB & Best of Winners under judge Linda Robey. Carl Foster showed Miss Lucy who now has 13 pts. Sire Ch Caralons ? Sword QED v Lebarland, dam Ch DeRousses Becca Faye Abbott CD, Judy **DeRousse doing the Happy Dance!!!**

Cimarron's Unchained Melody, GSD owned and bred by Steve 2 Dobbins, went RWB out of the Bred-By class under judge Steven Gladstone at the Hawkeye Kennel Club on Sunday, June 24, 2001.

Brag-Rochill's Laila owned by Denise Feldhaus out of Ch Ja-Don's Rocky Marciano CD X Ch R&B's One Moment In Time of D&L got her second point out of 12-18 at the Danville shows. Julie Foster

Dyna (Judeen's Gift, Kodak's Dynamite) took a major reserve at St. Charles Kennel Club held at Purina Farms in May. That's a point for Tim Trapp's Ch Aztec Kodak. I'm sure Judy Deane was smiling. And I can hear Ron say, "Way to go Hot Rod." **Terry Rock**

A Company of the Comp

A DOG'S PRAYER

Treat me kindly, my beloved master, for no heart in all the world is more grateful for kindness than the loving heart of mine.

Do not break my spirit with a stick, for your patience and understanding will more quickly teach me the things you would have me do.

Speak to me often, for your voice is the world's sweetest music, as you must know by the fierce wagging of my tail when your footstep falls upon my waiting ear.

When it is cold and wet, take me inside, for I am now a domesticated animal, no longer used to bitter elements. And I ask no greater glory than the privilege of sitting at your feet. Though had

you no home, I would rather follow you through ice and snow than rest upon the softest pillow in the warmest home in all the land, for you are my god and I am your devoted worshipper.

Keep my pan filled with fresh water, for although I should not reproach you were it dry, I cannot tell you when I suffer thirst. Feed me clean food, that I may stay well, to romp and play and do your bidding, to walk by your side, and stand ready and able to protect you with my life should your life be in danger.

And, BELOVED MASTER, should the GREAT MASTER see fit to deprive me of my sight, hearing and health, do not turn me away from you. Do not make heroic efforts to keep me going, I am not having any fun and I can no longer protect you. Hold me gently in your arms as skilled hands grant me the merciful boon of Eternal Rest. I shall leave this earth knowing with the last breath I draw, that my fate was always safest in your loving $_{\rm Page~36}$

Stud Dog Directory

Black Oak's Wiseguy v. Hadori

OFA HIPS GS57521G29M-T, ELBOWS GSEL10625-T Sire: Black Oak's De'Niro of Judeen OFA GS E44M-T Dam: Hadori's Chattahoochee, Prelims Normal

Joey is a correct to the standard, masculine young dog (25 1/2" and 85 Pounds) Joey has alot to offer including a bold fearless temperament, iron back, beautiful black and red plush coat, and correctly angled shoulder (Seldom seen today). A two year old with valuable old blood lines. Including Select Champion Lothario of Heinerburg, CD ROM AOE, Select Champion Bel Vista's Joey Baby ROM, and is heavily line bred on Champion Kubistaum's Kane ROM. Whose phenotype he reflects. Available to approved bitches. Must provide negative brucellosis and vaginal culture — NO EXCEPTIONS. Photo/Pedigree and Terms by request.

Mari-Fiori's Cigar

OFA HIPS GS54734G24M-T, ELBOWS GSEL9414-T Sire: Sel Am/Sel Can Ch Winning Way's Chimo OFA, H/E/T/Cx

Dam: Can Sel/Am Ch Mari-Fiori's Ruffian of Judeen, OFA, H/E/T/C HIC

Large, balanced young dog with deep, rich pigment a sweet temperament and a great sense of humor. Cigar has a beautiful forehand and a powerful elastic side gait, a nice dark eye and full and correct dentition. He should provide improvement in size and masculinity, proper angle, lay back of shoulder and of course movement and temperament.

THE RULES (CAT VERSION)

BATHROOMS - Always accompany guests to the bathroom. It is not necessary to do anything. Just sit and stare.

DOORS - Do not allow any closed doors in any room. To get the door open, stand on hind legs and hammer with forepaws. Once door is opened, it is not necessary to use it. After you have ordered an "outside" door opened, stand halfway in and out and think about several things. This is particularly important during very cold weather, rain, snow, or mosquito season.

CHAIRS AND RUGS - If you have to throw up, get to a chair guickly. If you cannot manage in time, get to an Oriental rug. If there is no Oriental rug, shag is good. When throwing up on the carpet, make sure you back up so it's as long as a humans bare foot.

HAMPERING - If one of your humans is engaged in some activity, and the other is idle, stay with the busy one. This is called "helping," otherwise known as "hampering." Following are the rules for hampering:

- a. When supervising cooking, sit just behind the left heel of the cook. You cannot be seen and thereby stand a better chance of being stepped on and then picked up and comforted.
- b. For book readers, get in close under the chin, between eyes and book -- unless you can lie across the book itself.
- c. When human is working at computer, jump up on desk, walk across keyboard, bat at mouse pointer on screen, and then lay in human's lap across arms, hampering typing in progress.

WALKING - As often as possible, dart quickly and as close as possible in front of the human, especially: on stairs, when they have something in their arms, in the dark, and when they first get up in the morning. This will help their coordination skills.

BEDTIME - Always sleep on the human at night so he/she cannot move around.

LITTER BOX - When using the litter box, be sure to kick as much litter out of the box as possible. Humans love the feel of kitty litter between their toes.

HIDING - Every now and then, hide in a place where the humans cannot find you. Do not come out for three to four hours under any circumstances. This will cause the humans to panic (which they love) thinking that you have run away or are lost. Once you do come out, the humans will cover you with love and kisses, and you probably will get a treat.

ONE LAST THOUGHT - Whenever possible, get close to a human, especially their face, turn around, and present your butt to them. Humans love this........ Page 41

LEASH: A strap which attaches to your collar, enabling you to lead your person where you want him/her to go.

DOG BED: any soft, clean surface, such as the white bedspread in the guest room or the newly upholstered couch in the living room.

DROOL: Is what you do when your persons have food and you don't. To do this properly you must sit as close as you can and look sad and let the drool fall to the floor, or better yet, on their laps.

SNIFF: A social custom to use when you greet other dogs. Place your nose as close as you can to the other dog's rear end and inhale deeply, repeat several times, or until your person makes you stop.

GARBAGE CAN: A container which your neighbors put out once a week to test your ingenuity. You must stand on your hind legs and try to push the lid off with your nose. If you do it right you are rewarded with margarine wrappers to shred, beef bones to consume and moldy crusts of bread.

BICYCLES: Two-wheeled exercise machines, invented for dogs to control body fat. To get maximum aerobic benefit, you must hide behind a bush and dash out, bark loudly and run alongside for a few yards; the person then swerves and falls into the bushes, and you prance away.

DEAFNESS: This is a malady which affects dogs when their person want them in and they want to stay out. Symptoms include staring blankly at the person, then running in the opposite direction, or lying down.

THUNDER: This is a signal that the world is coming to an end. Humans remain amazingly calm during thunderstorms, so it is necessary to warn them of the danger by trembling uncontrollably, panting, rolling your eyes wildly, and following at their heels.

WASTEBASKET: This is a dog toy filled with paper, envelopes, and old candy wrapper. When you get bored, turn over the basket and strew the papers all over the house until your person comes home

SOFAS: Are to dogs like napkins are to people. After eating it is polite to run up and down the front of the sofa and wipe your whiskers clean.

BATH: This is a process by which the humans drench the floor, walls and themselves. You can help by shaking vigorously and frequently.

LEAN: Every good dogs response to the command "sit!", especially if your person is dressed for an evening out. Incredibly effective before black-tie events.

BUMP: The best way to get your human's attention when they are drinking a fresh cup of coffee or tea.

GOOSE BUMP: A maneuver to use as a last resort when the Regular Bump doesn't get the attention you require.....especially effective when combined with The Sniff. See above.

LOVE: Is a feeling of intense affection, given freely and without restriction. The best way you can show your love is to wag your tail. If you're lucky, a human will love you in return.

I'd rather stay here Outside the pearly gate. I won't be a nuisance, I won't even bark, I'll be very patient and wait, I'll be here, chewing on a celestial bone, No matter how long you may be. I'd miss you so much, if I went in alone, It wouldn't be heaven for me.

I explained it to St. Peter,

One reason a dog is such a comfort When you are downcast Is that he doesn't ask to know why.

A dog can express more with his tail in minutes, than his owner can express with his tongue in hours.

When a dog wags his tail and barks at the same time, how do you know which end to believe?

A watchdog is a dog kept to guard your home, usually by sleeping where a burglar would awaken the household by falling over him.

Every dog isn't a growler, and every growler isn't a dog.

A dog's bark may be worse than his bite, but everyone prefers his bark.
